

Social Toasts

Social Toasts is a lightweight World of Warcraft addon that displays clean, unobtrusive toast notifications when your **friends or guild members** log in or out.

Designed especially for players who miss chat messages during combat, roleplay, or general chaos, Social Toasts puts the information you actually care about **front and center** — without blocking gameplay.

Features

- Toast-style notifications inspired by Retail achievement and loot popups
 - Supports **Friends** and **Guild members**
 - If someone is both a friend *and* a guild member, **Guild is prioritised**
 - Sound plays only when someone comes online (no logout noise spam)
 - Click-through toasts; they never block interaction with the world
 - Movable anchor
 - Drag to position
 - Right-click menu to lock, reset, test, or hide
 - Anchor position and visibility are saved between sessions
 - Minimalist, clean design that fits naturally into the WoW UI
-

Why use Social Toasts?

Have you ever:

- Missed a friend logging in because chat scrolled too fast?
- Been deep in RP, combat, or a dungeon and only noticed later?
- Wanted a visual nudge without UI clutter?

Social Toasts exists to solve exactly that.

“Hey. Your friend just logged in.

You might want to say hi.”

Commands

`/sctoast test`

Displays sample friend and guild toasts.

`/sctoastanchor`

Shows and unlocks the anchor if it has been hidden.

Anchor Controls

- Left-click and drag — move the toast stack
 - Right-click — open anchor menu:
 - Lock or unlock anchor
 - Reset to center
 - Show test toasts
 - Hide anchor (can be restored via command)
-

Compatibility

- Retail World of Warcraft
 - Lightweight and performance-friendly
 - No external libraries required
-
